BECAFIRE

BRING COMFORT
AND WARMTH
INTO YOUR HOME
SINCE 1976

THE FOUNDRY master of fire and materials

All Becafire products feature a cast-iron interior, which optimises the heat distribution in the living space. In addition, this makes it highly durable, providing years of warmth and enjoyment.

INSERT

INSERT TUNNEL

Our very latest addition to the insert family features a special system, making it extremely powerful and energy-efficient. What you need to remember is that connectable wood stoves do not suck air from the room. Instead, they use air from outside or take it from the empty space below the cassette via a connecting pipe.

FACILE D'UTILISATION

The combustion chamber in BECAFIRE products is so hermetic that the fire reacts to the tiniest movement of the air intake control.
The control components cool automatically, thanks to their special design.
The forms and movements of the control components are extremely natural and intuitive.

OUTSIDE AIR

Our very latest addition to the insert family features a special system, making it extremely powerful and energy-efficient.

What you need to remember is that connectable wood stoves do not suck air from the room. Instead, they use air from outside or take it from the empty space below the cassette via a connecting pipe.
